

TR6400

TROMMEL SCREEN

EU CONFIGURATION

ENGINE. The TR6400 features a Deutz 3.6L Tier 4F (Stage IV), 100 hp (75 kW) engine. The engine is mounted on a pivoting frame that swings out 30 degrees for access to fuel filters and hydraulic reservoir for maintenance and service.

PRODUCT VARIETY. Change product size more efficiently with the quick-change screen design. Five large bolts adjust a tensioning hook to allow operators to quickly change screen sizes.

CONTROL SYSTEM. Operators can control the machine through either the Vermeer DP10 display mounted on the control panel, or through a handheld transceiver remote. From either control, the operator can choose from four programmable presets or adjust on the fly based on the incoming material.

DRUM SERVICE ACCESS. A single-hinged side panel exposes the full length of the trommel drum from ground level for drum service and removal.

DRUM DRIVE. A hydraulic chain drive system allows the drum to lift off the cog for service. Bolt-on sprockets can be changed quickly and help minimize repair.

BUILT FOR EASE OF MAINTENANCE. The TR6400 has various access points to critical areas which allows the operator to efficiently maintain the machine.
